Career Objective

Motivated Computer Science Engineering student with knowledge of Java, Python, SQL, Web Development, AI, and Cybersecurity. Experienced in developing academic and personal projects using modern technologies and eager to solve real-world problems through software development. Seeking opportunities to contribute to a growth-oriented organization while enhancing my technical expertise and professional skills.

Education

GL Bajaj Institute of Technology and Management	2023 – 2027
B.Tech in Computer Science Engineering	CGPA: 7.4
DAV Public School (CBSE)	2022
Class XII	67%
DAV Public School (CBSE)	2020
Class X	76.4%

Technical Skills

Languages: Java, Python, C, C++, SQL

Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS

Backend: Node.js, Express.js, Spring Boot, REST APIs

Cybersecurity: Linux Security, Networking, Ethical Hacking, VAPT, Web Application Security, Kali Linux, Burp Suite, Wireshark, Nmap, Zenmap

Core Subjects: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks

Experience

AI & Prompt Engineering Intern, Vault of Codes (September 2025 - October 2025)

- Worked with Generative AI tools and designed structured prompts for automation and content generation.
- Improved AI-assisted workflows through prompt engineering techniques.

Projects

AI Virtual Mouse (Python, OpenCV, MediaPipe)

- Developed a gesture-controlled virtual mouse that enables cursor movement and click operations using real-time hand tracking.
- Utilized OpenCV and MediaPipe to detect hand landmarks and interpret gestures for controlling mouse events without physical hardware.

ForensiChain – Digital Evidence Investigation Platform (Java, Spring Boot, MySQL, AWS, SHA-256, OCR, AI)

- Built a digital forensics platform for secure evidence management, investigation case tracking, SHA-256 integrity verification, forensic metadata extraction, OCR, and chain-of-custody auditing.
- Developed Spring Boot APIs with MySQL and Thymeleaf for evidence lifecycle management, AI-assisted risk assessment, audit logging, access control, and automated PDF forensic reports, designed for AWS deployment.

DBMS Movie Ticket Booking System (Python, SQL, MySQL, DBMS)

- Built a movie ticket booking system for managing movie schedules, seat reservations, customer details, and ticket bookings.
- Implemented SQL queries through Python to perform CRUD operations and efficiently manage relational database records in MySQL.

Kolam Pattern Generator and Detector (TypeScript, Next.js, Tailwind CSS, Python, YOLOv8, Kotlin, PostgreSQL)

- Developed a full-stack application for generating and detecting Kolam patterns using AI-based image processing and computer vision.
- Built the frontend with Next.js and Tailwind CSS, integrated YOLOv8 and Python for pattern detection, used PostgreSQL for data storage, and Kotlin for mobile application support.

Certifications

- Cisco Networking Academy – 12 Certifications
- Palo Alto Networks Cybersecurity Academy – 7 Certifications
- Red Hat Academy – 3 Certifications
